John Dick

StrataFusion, Partner
jdick@stratafusion.com

John L. Dick is a co-founder of The StrataFusion Group, Inc., and is a well-known Silicon Valley technology veteran with over 25 years experience in the fields of technology management and strategic technology and technology product direction. John's expertise spans networks, enterprise applications, internet technology and business models, knowledge management, and complex computing environments.

Experience

Engagements include interim chief information officer for an internet infrastructure provider and an enterprise software provider. Chief technology officer for an internet integration tools provider, a commercial real estate internet portal provider, and an internet legal services provider. Other engagements include IT organizational, applications, and operations infrastructure support roles with media, medical instrument, and software integration companies. Formerly as vice president of technology operations for Intuit, he was responsible for the development and implementation of world-class technology practices for Intuits corporate and internet/web product technology infrastructure including network, fileserver, telecommunications, and internal/external data center operations.

Prior to joining Intuit, he held positions as the chief information officer for Plantronics, Inc. and Bay Networks/SynOptics Communications managing their worldwide information systems activities. John was also a member of the board of directors for Core Technology Group, Inc., which specialized in worldwide enterprise information systems consulting. He has also served on several corporate advisory boards. Johns teams have won multiple awards for enterprise systems architecture, design, web design, and functionality. His team was awarded a Computerworld Smithsonian Achievement Award for visionary use of technology; won once and was in the finals a second time for the CIO Magazine Award for return on investment in information technology.

Education

John holds a Masters of Science in Systems Management from the University of Southern California and a Masters of Business Administration in Finance from Golden Gate University. He also holds a Bachelor of Science degree in Business Administration from the University of Florida with a specialty in quantitative analysis, and has been Certified in Production and Inventory Management (CPIM). John is also a co-author of the book CIO Wisdom and holds patents in the areas of internet portal business processes and technology, internet software, and network integration tools.
